

ZEGUL DREKI MV

ABOUT DREKI MV

Dreki series kayaks meet the needs of a wide range of paddlers. These kayaks are for paddlers looking for stable onwater experience rather than getting wet through a playful day on the water. The hull has a flat V-design, which provides high initial stability. The Dreki series is intended to be paddled in calmer inland waters.

The Dreki MV is very easily maneuverable. This kayak has been brought to the market to be paddled more in inland waters. It is designed for smaller and medium sized paddlers who want to enjoy a roomier cockpit during paddling.

The Dreki series kayaks are equipped with a SmartTrack rudder and a retractable skeg. The Dreki MV and HV are available in lightweight A-Core LT lay-up, which means these kayaks are extra light.

FEATURES

Material	Composite
PCS	No
Length	444 cm (14'6")
