

GREENLAND GT

ABOUT GREENLAND GT

Zegul Greenland GT has the same characteristics as the classic Greenland kayak, but with slightly roomier design and more stability.

The Greenland GT has a smart design and is meant for paddlers wanting a classic Greenland style kayak, but need more comfort, storage space and stability for longer outings. The Greenland GT has slightly wider hull adding more stability and a roomier keyhole cockpit enables easier entrance and exit. GT has a day-hatch and enlarged rear hatch, increasing its storage capacity. GT as the original Zegul Greenland has a low volume and is extremely responsive. The kayak has a hard chine all the way along the V-bottomed hull and a high rocker to ease maneuvers. Rather low volume front deck helps you on the forward rolls and the low back deck for easy laid back rolls.
